BUILDING MORE GRACIOUS AND HARMONIOUS COMMUNITIES: FACILITATING EFFECTIVE RESOLUTION OF NEIGHBOUR DISPUTES

ANNEX B

How the Noise Sensors would be used

Figures 1 and 2 below illustrate the types of charts that can be produced from the sensors and that only processed data will be retained.
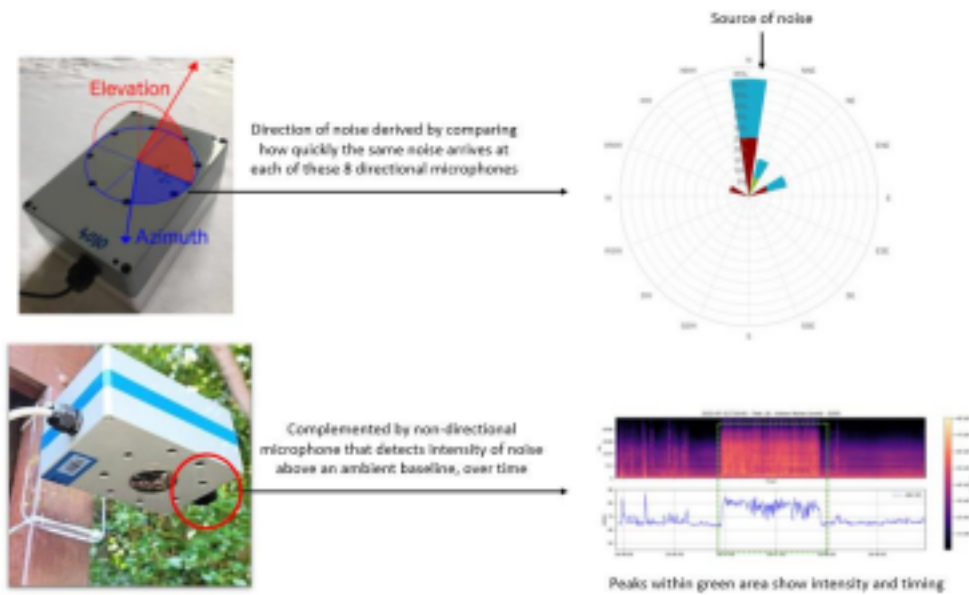

Figure 1: Types of Charts produced

Figure 2: Sensor data management

Source of noise

Elevation

Azimuth

Raw data transmitted
in real-time to 5G-
based servers

No data is retained on
the device. It only
records and transmits.

All raw data expunged
after processing

Peaks within green area
show intensity and timing

Only these processed data
will be retained:
- For CRU case work
- For CDRT and State
  Courts, if the case
  progresses to the Courts
